

how to win web.lab

Claire Cheng and Daniel Sun

plan out your
web app

How We Taught Catbook:

HTML + CSS (page content, structure, and design)

Client-Side JS (interactivity, API calls)

Server-Side Node/Express JS (creating routes, serving pages)

Databases using MongoDB and Mongoose (creating APIs, accessing and editing data)

Authentication (creating users and accounts, secure login)

How We Designed Catbook:

Full-Stack Design,
Feature-by-Feature

Full-Stack Design, Feature-by-Feature

Full-Stack: Design with all the layers of the app in mind

Front-End, Server-Side, Database

Feature-by-Feature: Design each feature independently

Full-Stack Design: Profile

- Creating detailed wireframes
- Creating a component tree
- Designing APIs
- Designing database schemas

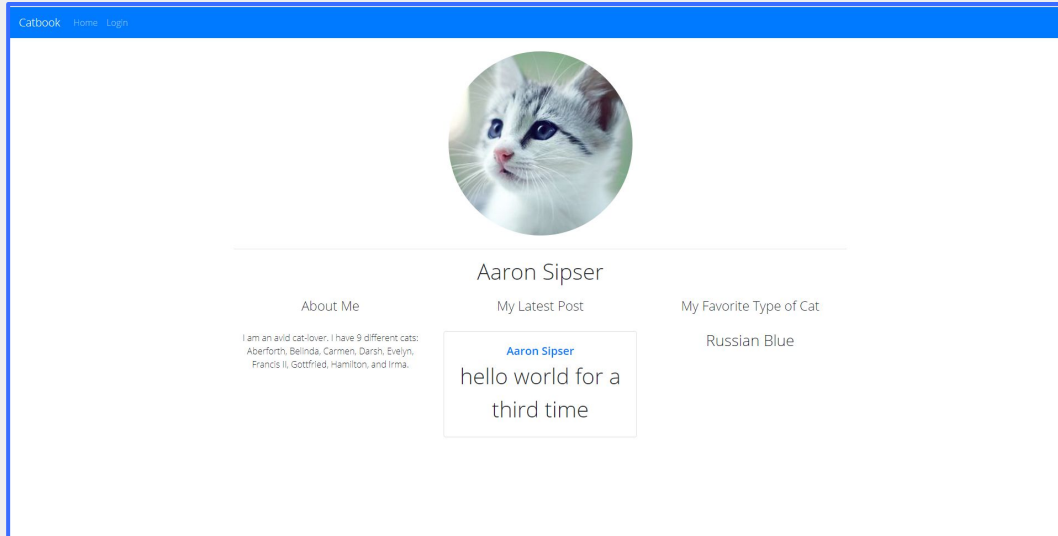

Full-Stack Design: Profile

Visual display of information about a user

Full-Stack Design: Profile - Wireframing

Feature: Visual display of information about a user

How to Design: Ask “What do we want to show?”

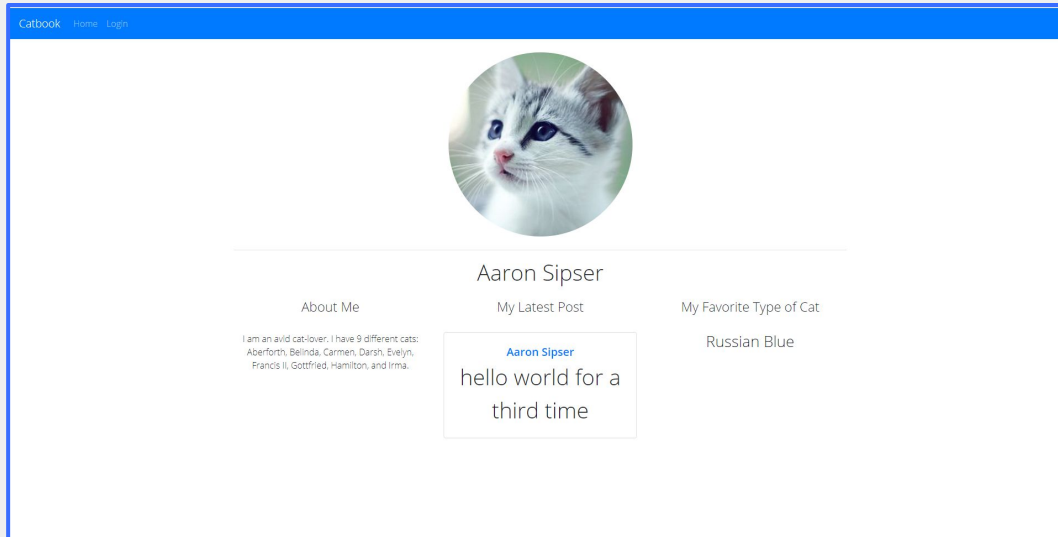

TODO:
Figma
Figure out what
redirects where

Full-Stack Design: Profile - Front-End

Feature: Visual display of information about a user

How to Design: Ask “How to translate to frontend? (React)”

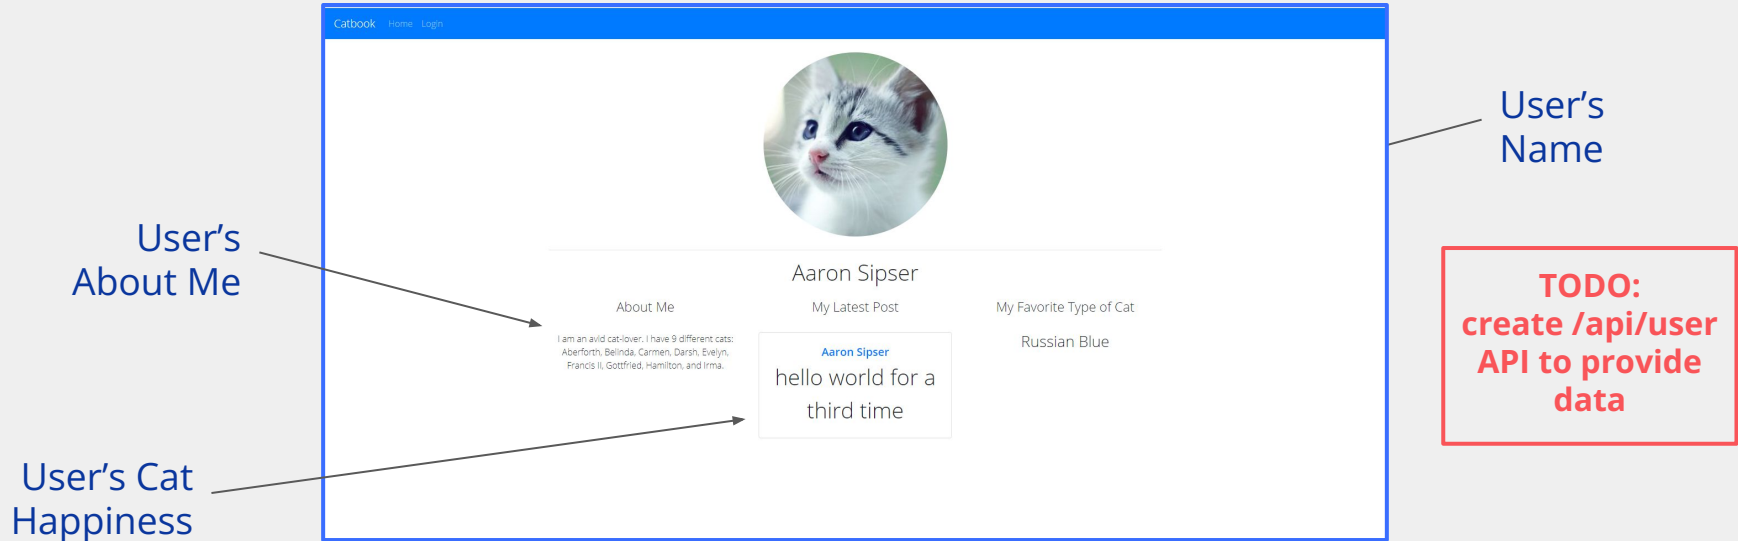

**TODO:
create
profile.css,
profile.js**

Full-Stack Design: Profile - Server-Side

Feature: Visual display of information about a user

How to Design: Ask "What does the client need?"

Full-Stack Design: Profile - Database

Feature: Visual display of information about a user

How to Design: Ask “What data do we need to store?”

User:

- name
- cat_happinness
- about_me
- . . .

TODO:
create a
mongoose
schema/model

Full-Stack Design: Profile

Visual display of information about a user

TODO:
create
profile.js,
profile.css

TODO:
create /api/user
API to provide
data

TODO:
create a
mongoose
schema/model

How We Designed Catbook:

<u>Feature</u>	<u>Profiles</u>	<u>Stories (posts)</u>	<u>Comments</u>
Front-End	Profile page with name, description, cat happiness	Card with name, story, comments	Card footer with name, comment
Server-Side	/user API request for above info	/stories API request for above info	/comment API request for above info
Database	User MongoDB Schema/Model	Story MongoDB Schema/Model	Comment MongoDB Schema/Model

Planning ahead will help you stay organized and improve productivity!

keep your plan
updated

Your plan should serve as good
documentation and a method of
communication between your team.

As your team makes decisions, your plan should reflect this.

communicate
with your team

divide up the work

FRONT-END

FULL-STACK

BACK-END

focus on that one
killer feature

quality > quantity

Join social game lobbies from any browser, no install required

Raise your magikarp to jump higher than anyone else's

use your team's
strengths.

Team of 3 artists make a beautiful hand-drawn game
